

GIRL SCOUTS OF THE PHILIPPINES

Management Information System

User Guide — how to use the portal, what each role can do, and the data rules every form follows.

Version 1.0 · 2026-07-25

1. Introduction

The GSP Management Information System is a web portal for running Girl Scouts of the Philippines council and troop operations online: membership registration and approval, events and attendance, badges and achievements, announcements, finances, reports, and analytics — all under role-based access so each person only sees and does what their role allows.

The system serves three roles:

Role	Who they are	Focus
Administrator	Council/system staff running the platform	Full access — membership, events, finance, users, system settings
Executive Council	Council leadership overseeing operations	Approvals, monitoring, reporting, analytics, announcements
Troop Leader	Leader of a single troop	Their troop's members, attendance, activity reports, badges

Every screen adapts to the signed-in role automatically — there is no way to view another role's data by changing a menu or a URL. Access is enforced on the server, not just hidden in the menu.

2. Getting Started

2.1 Creating an account (Sign Up)

Open the portal and select the **Sign Up** tab on the login screen, then choose your role. Each role collects different account details:

Field	Troop Leader	Executive Council	Administrator
First / Last name	✓	✓	✓
Email address	✓	✓	✓
Password (8+ characters)	✓	✓	✓
Troop number	✓	—	—
Primary scout level	✓	—	—
Home council	✓	—	—
Council name	—	✓	—
Region	—	✓	—
Council code	—	✓	—
Employee ID	—	—	✓
Admin secret key	—	—	✓ (issued by IT/system owner)

A new account is created immediately and signs you in — but a Troop Leader or Executive Council signup is not yet linked to a real troop/council record. An Administrator must assign you to your troop/council afterward (**Councils & Troops** screen) before troop- or council-scoped data (dashboard, roster) will show anything.

2.2 Logging in

Enter your email and password on the **Log In** tab and select your role. If your credentials are wrong, the system shows a generic "Invalid email or password" message — it never reveals whether the email itself exists, as a security precaution.

2.3 Forgot your password?

Click **Forgot password?** on the login screen and enter your email. If the address is registered and active, you'll receive an email with a one-time reset link that expires in **1 hour** and can only be used **once**. For privacy, the on-screen message is identical whether or not the email is actually registered — this prevents outsiders from using the form to discover valid accounts.

Opening the link takes you to a page to set a new password (minimum 8 characters). Completing a reset **signs you out of every device** you were previously logged into, as a security measure — sign back in with the new password afterward.

2.4 Signing out

Use **Sign out** at the bottom of the sidebar. This ends your session on this device; it does not affect other devices unless you've just completed a password reset.

3. Navigating the Portal

- **Sidebar** — grouped into Main, Activities, Administration, and Account sections. Only the items your role has permission for appear; everything else is hidden, not just disabled.
- **Topbar** — page title, and a notification bell with your personal notifications.
- **My Profile / Settings** — always in the Account section at the bottom; Settings only appears for Administrators.
- **Mobile / tablet** — below 900px the sidebar collapses behind a menu button; tap it to open an overlay panel, tap the backdrop or press Escape to close it.
- **Direct links** — if you paste or bookmark a URL for a screen your role can't use, you're redirected back to the Dashboard rather than shown an error.

4. Roles & Permissions (RBAC)

Access is controlled by a fixed set of **permissions**, and each role is granted a fixed list of them. A user has exactly one role. This table is the authoritative reference for what each role can see and do anywhere in the system.

Permission	What it governs	Administrator	Executive Council	Troop Leader
members:read / write	View & register/edit members	✓	✓	✓
members:approve	Approve/reject pending registrations	✓	✓	✗
members:archive	Archive/restore a member	✓	✓	✗
organizations:read	Browse councils/troops/levels/categories	✓	✓	✓
organizations:write	Create/edit/delete councils/troops/levels/categories	✓	✗	✗
events:read	View events, register/mark attendance	✓	✓	✓
events:write	Create/edit/delete events	✓	✗	✗
attendance:read	View attendance	✓	✓	✓
attendance:write	Register participants & mark attendance	✓	✗	✓
badges:read	View badge catalog & progress	✓	✓	✓
badges:write	Manage catalog / record earned badges & achievements	✓ (catalog + record)	✗	✓ (record only)
badges:verify	Verify an earned badge	✓	✗	✗
activity-reports:read	View activity reports	✓	✓	✓
activity-reports:write	Submit an activity report	✓	✗	✓
finance:read	View payments, expenses, summaries	✓	✓	✗
finance:write	Record payments/expenses, manage fee types	✓	✗	✗
reports:read	Generate/view reports	✓	✓	✓ (scoped)
reports:export	Export a report to PDF/Excel	✓	✓	✗
analytics:read	View the Analytics dashboard	✓	✓	✗
notifications:read	Personal notification bell/history	✓	✓	✓
announcements:write	Post a council announcement	✓	✓	✗
users:manage	Create/edit/deactivate/delete portal users	✓	✗	✗
settings:manage	Edit system settings, run backups	✓	✗	✗
audit-logs:read	View the audit log	✓	✗	✗

Notes:

- The **Administrator** holds every permission.
- **Membership** data (register, edit) is open to all three roles because troop leaders are the primary source of new registrations; **approval and archiving** require Executive Council or Administrator judgment.
- **Attendance and badge recording** are hands-on troop-level tasks, so Troop Leaders can do them; **Executive Council is read-only / monitoring-only** across Events, Attendance, Badges, and Finance.
- **Financial Tracking, Analytics, Settings, and User Management** are not visible to Troop Leaders at all.

- **Report Generation** is visible to everyone, but a Troop Leader can only generate Membership, Attendance, Badge, and Activity reports for their own troop — **Financial** and **Executive** report types are Administrator/Executive Council only, and exporting (PDF/Excel) is restricted to Administrator and Executive Council.

5. Module Guide

5.1 Dashboard

Landing page after login. Content is chosen by your role — never by anything you can control on screen:

- **Administrator** — org-wide stat cards, a 6-month Membership Growth chart, a Members by Status donut, a Recent Activity feed, and a Troops Overview list.
- **Executive Council** — council-scoped stat cards, the same Troops Overview, and a Membership by Scout Level breakdown.
- **Troop Leader** — troop-scoped stat cards, "My Troop" roster, and the same Scout Level breakdown for their own troop.

If a Troop Leader account hasn't been assigned to a troop yet (see §2.1), the dashboard shows a "No Troop Assigned" message instead of numbers — this is expected, not an error; ask an Administrator to link the account under **Councils & Troops**.

5.2 Councils & Troops (Organizations)

Browsable by everyone; only Administrators see the Add/Edit/Delete controls. Five tabs:

- **Councils** — name, description
- **Troops** — troop code, name, parent council, assigned leader
- **Scout Levels** — the age-band ladder (Twinkler → Cadet, extendable), with a display order
- **Badge Categories** — groupings used by the Badges catalog
- **Activity Categories** — groupings used when creating Events

Deleting a council, troop, or category is blocked if anything still references it (e.g. a troop with members, a category with badges) — resolve or reassign those first.

5.3 Membership Registry (Members)

Every role can register a new member and edit existing ones, and the registry shows members across **all** troops (it is not narrowed to your own troop). The **one registration form** handles both member types — pick **Scout** or **Adult Leader** at the top; the Scout Level field only appears (and is only required) for scouts.

Required fields: First name, Last name, Birthdate, Troop, and Scout Level (scouts only). Everything else — email, phone, address, emergency contact, notes — is optional.

New registrations start in **Pending** status and do not become active until approved (§5.4). From a member's profile you can also:

- **Renew** their membership (choose a new start/end date; this appends a new membership period rather than overwriting the old one — history is preserved)
- **Archive** — removes them from the active registry without deleting the record (Administrator/Executive Council only)

- **Restore** an archived member back to active

5.4 Pending Approvals (Administrator + Executive Council only)

A queue of members awaiting review. Opening a row shows their full submitted profile.

- **Approve** — moves the member to Active immediately.
- **Reject** — requires a reason of at least 5 characters, so the applicant/troop leader knows what to fix; the reason is stored and shown on the member's profile afterward.

5.5 Event Management

Everyone can browse events (list or calendar view, with search/status/category filters). Only Administrators can create, edit, or delete an event.

Required fields: Title, Event Date, Category. Start/End time are optional but if both are given, End must be after Start. From an event's detail page you can also open **Manage Attendance**, which deep-links into the Attendance screen for that event.

5.6 Attendance

Pick an event, then work from one combined table of registered participants:

- **Register a participant** — Administrator and Troop Leader only; opens a search picker limited to active members not already registered for that event.
- **Mark present/absent** — Administrator and Troop Leader only.
- Executive Council can view the same screen (stat cards + table) but has no write controls.

Cancelling a registration removes that member from the attendance-eligible list for the event.

5.7 Activity Reports

Troop Leaders see "My Activity Reports" — only the reports they themselves submitted — and a Submit button; Administrator and Executive Council see every troop's reports with Submitted By/Troop columns. Executive Council is read-only here.

Submitting a report requires picking a **completed** event (the picker only offers events whose date has passed) and writing a Summary; Participation Notes and Outcomes are optional.

5.8 Badges

One screen, three tabs, plus a page-level **Record Badge** action:

- **Badge Catalog** — the master list of badges (name, category, required points, requirement checklist). Create/edit/delete is Administrator-only.
- **Member Progress** — a per-member table of badge status (in_progress / earned / verified). Opening a member shows their full badge list; **Verify** an earned badge is Administrator-only. A Troop Leader sees (and can record badges for) only **their own troop's** members here; Administrator and Executive Council see every troop.
- **Achievement History** — a free-form log of notable accomplishments (not tied to the badge catalog), e.g. delegate appointments or awards.

Record Badge (Administrator + Troop Leader) logs a member as in_progress or earned against a catalog badge. A separately-recorded **Achievement** just needs a member, a name, and a date.

5.9 Announcements & Notifications

- The **notification bell** (every page, every role) shows your personal alerts — approvals, badge verifications, and similar events addressed to you.
- **Announcements** (sidebar, Activities section) is a council-wide feed. Administrator and Executive Council can post (Title, Content, optional expiry date); Troop Leaders are read-only recipients.

5.10 Financial Tracking (Administrator + Executive Council only)

Four tabs:

- **Overview** — income-vs-expense trend, expense-by-category breakdown, budget & collection summary.
- **Payments** — paginated ledger; **Record Payment** (Administrator only) needs a Member, Fee Type, amount greater than 0, and payment date; method (cash / bank transfer / GCash / cheque) and status (pending / paid / refunded / cancelled) default to cash/paid if left alone.
- **Expenses** — paginated ledger; **Record Expense** (Administrator only) needs a Description, amount greater than 0, and date; category is optional free text.
- **Fee Types** — Administrator-only CRUD (e.g. Annual Membership Fee, Camp Fee). A fee type already used by a payment can't be deleted until reassigned.

Executive Council can view every tab but has no record/edit controls anywhere in this module.

5.11 Report Generation

One screen covering six report types — **Membership, Attendance, Badge, Financial, Activity, Executive** — presented as a picker already filtered to what your role may generate (Troop Leaders never see Financial or Executive). Choose a report type, a date range, and optionally a Troop, then preview stat cards and a data table before exporting.

Export to PDF or Excel is Administrator and Executive Council only. Every export is recorded in a **Report History** table you can revisit and re-download later.

5.12 Analytics (Administrator + Executive Council only)

Six tabs of aggregate, org-wide insight — **Membership, Attendance, Participation, Badges, Financial, Organization** (per-troop performance) — each with stat cards and a chart. This module is read-only; nothing here is editable.

5.13 Settings & System Administration (Administrator only)

Four tabs:

- **System Settings** — organization name, membership term length (months), renewal window (days), and whether email notifications are enabled.
- **Users & Access** — the Portal Users table (search, filter by role, pagination). **Add User** needs Full Name, Email, Role, and an 8+ character temporary password. From a user row you can edit their details/role, reset their password, activate/deactivate, or delete them. The system will not let you deactivate, delete, or demote the **last remaining Administrator** — this guard exists so the portal can never be left with no one able to manage it.

- **Audit Log** — a read-only, searchable, paginated record of who did what and when (approvals, user changes, settings changes, backups, etc.).
- **Backups** — a manual "Run Backup Now" action and a history of past runs, both sourced from the same audit trail.

5.14 My Profile (every role)

Your own account only — there's no way to view or edit anyone else's profile here (use **Settings → Users & Access** for that, Administrator only).

- **Account Information** — edit your Full Name, Email, and Phone; Role and Member Since are shown read-only.
- **Change Password** — requires your current password plus a new one (8+ characters). An incorrect current password is rejected without changing anything.

6. Data Constraints Quick Reference

These rules are enforced on both the screen (immediate feedback) and the server (so they can never be bypassed by skipping the form):

Data	Rule
Dates	YYYY-MM-DD. Any "end" date must be on/after its matching "start" date (renewals, report ranges).
Times (events)	24-hour HH:MM. End time must be after start time if both are set.
Passwords	Minimum 8 characters — signup, new portal users, password reset, and password change.
Email addresses	Must be a valid email format; must be unique per account (no two users share one email).
Member registration	First name, last name, birthdate, and troop are always required; Scout Level is required only for member type "Scout".
Rejection reason	Minimum 5 characters.
Money amounts	Payments, expenses, and fee-type amounts must be greater than 0.
Badge required points	Whole number, 0 or higher.
Badge requirements	At least one requirement line.
Deletes with dependents	Blocked, not cascaded — e.g. a fee type in use, a troop with members, a category in use. Reassign or remove the dependents first.

7. Troubleshooting / FAQ

"I was sent back to the Dashboard when I tried to open a page."

That screen isn't included in your role's permissions (§4). This is expected behavior, not a bug — if you believe your role is wrong, ask an Administrator to check your account under **Settings → Users & Access**.

"A menu item I expected to see is missing."

The sidebar only shows what your role can use. Compare against the permission table in §4 — if it's genuinely missing for a role that should have it, that's worth reporting.

"My Troop Leader/Executive Council dashboard shows no data."

Your account likely isn't linked to a troop/council yet. This happens for self-signed-up accounts (§2.1) until an Administrator assigns you under **Councils & Troops**.

"I got signed out unexpectedly."

Sessions expire after a period of inactivity for security. Simply log back in — nothing is lost, since the system saves as you go (there are no unsaved drafts to lose).

"The form won't submit / shows a red error."

Check the specific field(s) called out — the message tells you exactly what to fix (a missing field, an invalid email, a date out of order, etc.). See §6 for the full rule list.

"I can see a screen but the buttons to add/edit/delete are missing or disabled."

That's read-only access for your role on that screen (e.g. Executive Council on Finance, Troop Leader on Events) — viewing and doing are governed by separate permissions.

This guide reflects the system as of 2026-07-25. If a screen you're using doesn't match this description, check with your system administrator — the portal may have been updated since.
